

BX *Sub-Compact Tractors*
BX1850/BX2350

FEATURES

HYDROSTATIC POWER STEERING

A standard feature, power steering makes steering practically effortless, reducing stress and operator fatigue.

HALOGEN LIGHTS

The halogen headlights offer a clear bright light at dawn, dusk or dark of night. Furthermore, the casing and style has been newly redesigned, giving the tractor a sleeker look.

SLANTED HOOD DESIGN

The new slanted hood and rounded design offer improved visibility for the operator and a sleek upscale look you'll be proud to show off in your garden or yard.

LOADER JOYSTICK LEVER

The simple movement of the single-joystick easily controls all front loader operations, including simultaneous operation of the boom and bucket.

RIGID ROPS

Rigid Roll-Over Protective Structure comes standard on the BX1850 and BX2350.

BX *Sub-Compact Tractors*
BX1850/BX2350

FEATURES

HIGH BACK SEAT WITH SEAT-MOUNTED SEATBELT

The seatbelt of the new BX1850 and BX2350 has been attached to the seat so that it won't restrict or become too tight while the tractor is in motion. Combine this with the deluxe high back seat for an operating experience more comfortable than ever before.

HANDRAILS

The BX1850 and BX2350 both come with handrails for operating and maneuvering easily.

REAR DIFFERENTIAL LOCK

This feature contributes to more stable mowing operations by working to prevent slippage and skidding when working on wet grass.

VERSATILE CATEGORY I 3-POINT HITCH

Put your BX1850 or BX3250 to work with its Category I 3-point hitch. This sturdy and technologically advanced hitch allows you to attach a wide array of full-fledged tractor implements.

FRONT IMPLEMENT 4-POSITION VALVE

A new feature on the BX1850 and BX3250 tractor is our standard front implement 4-position valve (tractor can also be ordered without valve). Now part of the tractor, this valve provides you with the ability to quickly and easily attach the front loader and other front-mounted implements. Furthermore, the valve does not get in the way and gives the tractor a clean and sleek look.

BX *Sub-Compact Tractors*
BX1850/BX2350

FEATURES

TURF & BAR TIRES (BX1850)

TURF, BAR & R4 TIRES (BX2350)

The BX1850 comes with TURF or Bar tires; the BX2350 comes with TURF, R4, or BAR tires.

EASY TO READ INSTRUMENT PANEL WITH DIGITAL TACHOMETER

The new BX1850 and BX2350 features a digital tachometer that offers operators more precise monitoring on engine revolutions, especially when operating the PTO. When the engine is off, the digital tachometer displays the hour meter.

2-PEDAL INLINE HST

When frequent changes in speed and direction are needed, the HST responds with its smooth operating forward and reverse pedals, leaving your hands free for steering and implement control. By splitting one pedal into two, operators are offered more foot room on the operator's platform

12 VOLT DC OUTLET

Charge your cell phone while you work. The standard DC outlet provides power on the go.

QUARTER-INCHING VALVE

With 1/4 inch adjustment increments at the lower link end, our quarter inching valve provides easier implement control. The lever guide's regulator allows smaller adjustments, which are often required when attaching/detaching 3-point mounted implements or when performing sensitive jobs.

BX *Sub-Compact Tractors*
BX1850/BX2350

FEATURES

CUP HOLDER

A convenient cup holder provides refreshment while you work.

DELUXE LEVER GUIDES

Stylish deluxe lever guides provide comfortable, easy operation.

LARGER OPERATOR'S PLATFORM

We've changed the pedal layout to increase operator comfort. We've split the forward and reverse HST pedals and moved the differential lock to the side of the seat. These changes give operators a larger deck area. Widened by four inches and lengthened by a full two inches, this wider step offers more foot room than prior BX models, eliminating the cramped feel of most garden tractors.
